Project

Buggy Alumni Association's Website Project | *Figma, HTML, CSS, Javascript, Bootstraps*

- Led the low-fi, mid-fi, and hi-fi wireframes' design of the new Buggy Alumni Association's Website, serving 500+ old and current members of Buggy, a signature sport of Carnegie Mellon University, using Figma.
- Assisted in coding three webpages of the website using HTML, CSS, and Bootstraps.
- Conducted 3 rounds of user testings with a total of 10 users and incorporated the users' feedback to improve the wireframes' designs.
- Acted as the main coordinator between the clients from the Buggy Alumni Association and the team.
- Communicated with the clients on a weekly basis in order to stay on the same page throughout the project.

Experience

National Nanotechnology Center

Intern

March 2022 - May 2022

Bangkok, Thailand

- Analyzed the utilization of different classification models in predicting the maturity stage of a coconut from its knocking sound.
- Gained exposure to machine learning and supervised learning model in python.
